Lunatics part 1

Originally written on May 24, 2025 and posted on my Facebook Blog. A few days later, the listing for my Facebook Blog page disappeared from Google. I decided to upgrade my ElaHoward.com page and post it there as a PDF.

PDF file:

20250524_Lunatics_part_1

Lunatics, part 1. Today, I'll write about Lunatics.

I'm afraid of retaliation from the Cult.

The Cult doesn't like to be called "lunatics." The Cult doesn't want anybody to expose their secrets. But I'm still at it.

I'll use a very popular book - the Bible. In the book of Matthew, lunatics are healed by Jesus.

And I will use some other examples.

Including - from ancient Greece - 4th century BC - philosophers Plato and Aristotle Especially Aristotle's views on epilepsy and "genius."

What does epilepsy have to do with genius, lunatics, the Moon, Socrates, Plato and Aristotle? And with politics? A lot.

Psych-ops go all the way back to ANCIENT GREECE. An event was "predicted" and then, the event HAD to happen. Predictive programming.

In ancient Greece, politics was based on ancient "Oracles," persons who got into trances and "flew into the sky" (in their heads), or "to the Moon," or into "space," "came back with a message" and "predicted" the future. These "predictions" were used in politics and manipulation.

"Lunatics" (from Latin Luna=Moon), means people who "flew to the Moon" (in their heads). Some of these "Oracles" or "ancient magicians" had epilepsy and had "visions". That's why lunatics (Luna-in Latin-Moon) were called "Lunatics."

The masses - the people/peasants/soldiers (and some leaders) were manipulated by these "ancient magicians".

I should give a disclaimer: This post is not medical advice.

I accredited my medical degree in the USA in 1997. But my medical career got cancelled. This post is my personal opinion.

Stay sane. Stay healthy. Avoid psychedelics.

"Ancient Magicians" vs modern medicine

I was trained as a Medical Doctor. According to my training, epileptic trances experienced by the "ancient magicians" were/are a medical issue.

But in ancient Greece epilepsy was seen differently.

In the 4th century BC, the ancient Greek philosopher Aristotle was the tutor of Alexander the Great, the great conqueror.

Did Aristotle help Alexander, through use oracles and trances - psych-ops - in his conquest?

Yes.

Aristotle was more of a rational thinker. Aristotle probably thought, "this stuff is C-R-A-Z-Y, but it WORKS."

People/peasants/soldiers were given the "predictions" during events, rallies, under hypnotic trance, while being subjected to psychoactive substances.

Did the METHOD work? Yes.

Alexander conquered Greece, the territory that is now ancient Anatolia (now Greece and Turkey), Egypt, Mesopotamia (with ancient Babylon) (now Iraq and Kuwait), Phoenicia (the Mediterranean coast in the Levant, (now Lebanon and Syria), ancient Persia (now Iran), Afghanistan.... all the way to Northern India.

These days, politics done by the same playbook.

By people who claim to be descendants of these ancient philosophers and Alexander-people, the Cult.

The Cult uses the same METHODS, but new TOOLS. The "oracles" are now on the internet. Psychoactive substances that used to be alcohol and plants - are now chemicals.

Main thing:

Beware of the "Red Pill" - it's the Cult's code-word for psychedelics.

"Red Pill" is a phrase from the film "Matrix." It's supposed to mean some kind of path to achieving some kind of truth.

It isn't. "Red Pill" is the Cult's code-word for poisoning us, the people/peasants with chemical neurotoxins (brain-damaging) psychedelics.

In the late 1990s, I was invited to Portland, Oregon, USA to study in a "school of Jungian psychology."

It took me a while to realize that it was a psychological, biological, cultural, technological (etc) warfare program.

Allegedly, the idea of "Matrix" ("Red Pill") was invented by the Leader/Guru of Portland Cult, himself (Cult's words).

Allegedly, the Cult goes "all the way back" to the times of Alexander and Aristotle.

UNDERSTAND. Stay sane. Stay focused.

Before I get to the Bible and to Alexander, let's see what Google tells us about "Lunatics."

I just Googled the word "Lunatic."

No answer from Google AI (artificial intelligence).

The Dictionary tells us that a "lunatic" is "a mentally ill person (not in technical use)."

But, what does a lunatic have to do with the Moon?

I just Googled "epilepsy flying to the moon."

Google AI told me "While there's no direct medical link between flying to the moon and epilepsy, a child with epilepsy did indeed have a "moon flight" granted by Make-A-Wish." "Make a Wish" is a non-profit organization staging events for children.

Google disconnects the dots.

Google doesn't tell us what I just told you.

In the late 1990s the Cult told me that I'm the only doctor on the planet who can figure it out.

Certainly, I shouldn't be. There should be many doctors (medical doctors) who should figure it out easily. Medical doctors should know what symptoms of epilepsy are. And what epilepsy has to do with "flying to the Moon."

But the information is suppressed. Dots are disconnected.

I know what flying to the "Moon" has to do with epilepsy, because I was trained as a medical doctor.

And because I met the Cult.

In the late 1990s the Cult/Sect/Family invited me to Portland, Oregon, to study and to work for them. I met the Cult, I was told their stories, I saw some of their behaviors/symptoms.

The Cult wanted me to become their employee, their propagandist, their bamboozler. And more.

I refused.

Now, for the last several years, I've been researching the Cult, trying to expose them

I'm afraid of Cult's retaliation.

I've been threatened and harassed for a long time.

I might become homeless. I might be forced out of our real estate.

I should be focusing on my everyday reality - packing, finding a safe place to live for myself and my husband.

But where would we go?

So I better use my time wisely. I better say what I have to say and write it down, quickly.

What I have to say is not on Google. We are told to "just Google it", but the information is NOT on Google. Or the information on Google's is skewed. Google disconnects the dots.

I just Googled a specific question, "what does lunatic have to do with the moon and epilepsy."

Google AI told me that "The term "lunatic" is rooted in the Latin word "luna," meaning moon, and was historically used to describe individuals perceived as having mental instability or epilepsy, which were believed to be influenced by the moon's cycles."

Hmm... But - what does the MOON have to do with epilepsy!

Understand. Stay focused. Protect us.

Lunatics in the Bible - the book of Matthew

At the beginning of the Common Era, or Christian Era (CE) - when the Christian Gospels were written, people already knew the connection between the EPILEPSY and the MOON.

In the Bible, King James' version, the word "lunatic" (spelled lunatick) is used twice, in the Gospel of Matthew.

In Matthew 4:24, Jesus heals all kinds of people, including lunatics.

I looked at the Greek original - the word lunatik, in Greek is σεληνιαζομένους (selēniazomenous) Selenia-zomenous.

In Greek the word σεληνια (Selenvia or Selena) - means - the Moon.

In Latin, the Moon is Luna. That's where the word lunatic comes from. Luna-tic.

Matthew 17:15 (King James version)

"Lord, have mercy on my son: for he is lunatick, and sore vexed: for oftentimes he falleth into the fire, and oft into the water."

The word "lunatic" in Greek, is σεληνιαζεται (selēniazetai). Selenia-zetai.

I'm not an expert in Greek. I just see that it's similar to σεληνιαζομένους (selēniazomenous) (Selenvia or Selena) - in ancient Greek means - the Moon. Or Moonie.

It's interesting to know how the verse is translated by other versions of the Bible.

Matthew 17:15

<https://www.biblegateway.com/verse/en/Matthew%2017:15>

he is epileptic, and suffereth grievously;

he is a lunatic (moonstruck)

he has epilepsy (is moonstruck)

he is lunatick, and sore vexed:

he has seizures

He has a bad case of epilepsy and often falls into a fire or into water.

He cannot control his body. Sometimes he does not know what he is doing.

he is mentally deranged

He goes out of his mind and suffers terribly, falling into seizures.

He shakes wildly
He is very sick and at times loses the use of his mind.
he is delirious, and is sorely vexed.
He suffers from awful fits
A bad spirit is in him
he is lunatic, and suffereth evil, for oft times he falleth into the fire, and oft times into the water.

So, "lunatic" is often translated as an "epileptic," a person who has SEIZURES, who "SHAKES wildly and SUFFERS a great deal."

Now, in the 20th and the 21st centuries, epilepsy is diagnosed and treated medically.
Now, "Epilepsy" and "Epileptic" are medical terms.
Now, we should know that epilepsy is caused by neurological malfunction of the brain, or, some parts of the brain.

Epilepsy in ancient Greece

In the ancient times. In the ancient times, people didn't have as much knowledge as we do now. The ancient Greeks believed that persons with epilepsy had "prophetic visions." Strangely, in ancient times, epilepsy was even called a "sacred disease." Some people with epilepsy were seen as "visionary leaders."

In ancient Greece, the philosopher Aristotle (4th century BC) was a tutor/helper of Alexander the Great. Aristotle wrote about the connection between epilepsy and dreams. Aristotle is said to have connected epilepsy with "genius." The "genius predictions" in ancient Greece were made by an "Oracle" - like the Oracle of Delphi. These "predictions" were then "interpreted" and used to manipulate people/peasants/slaves. And even leaders.

The ancient "predictive programmers" - the "ancient magicians" very likely had epilepsy themselves.

The "ancient magicians" were very successful in using predictive programming in politics. The "ancient magicians" had "visions." The "magician assistants" interpreted these visions and conveyed them to the people/peasants/slaves.

These days, there are lot's of psych-ops.

Contradictory information, "predictions," mass hypnosis and drugs.

It's good to know HOW these psych-ops are made.

Knowing the METHOD makes us less vulnerable.

Understand. Stay focused. Stay sane.

The "ancient magicians" kept their secrets in the family. They kept inheriting their neurological and mental traits. As a family. And kept going. And going. Until now.

In the late 1990s, some of my Portland Cult friends/handlers were from Greece. My Greek friends wanted to teach me about the Oracle of Delphi and invite me to Greece. I didn't go. We stopped being friends.

Learn. Stay healthy. Understand.

Luna ~ Moon ~ epilepsy

Because I was trained as a medical doctor, I know about the connection between epilepsy and the Moon.

Luna, in Latin - the Moon.

Some persons with epilepsy, especially a certain type of epilepsy (partial, temporal lobe) or an epileptic fugue - a prolonged epileptic state - might have complex, hallucinatory episodes where they experience "timelessness," and "flying." Some people might feel like they are flying to the Moon!

"Flying to the Moon" in their head!

Some persons with some types of epilepsy also experience flashes of light - like seeing the Sun, or a bright light, or fire, or an exploding volcano.

Some people experience sounds - like crackling fire, or firecrackers, or gunshots or explosions.

Some people feel like they have "superpowers."

And they "time-travel" through time and space. In their head!

And they experience depersonalization and derealization - "living in a simulation," or a "machine," or in a "dream."

That's mostly during the epileptic episode.

Before an epileptic episode, some people might experience darkness, like being in a cave, or a grave, or underground - in the underworld, world covered with ashes, GLOOM, anxiety, depression and suffering.

They want to come out of the underground cave! They want to fly from the GLOOM to the MOON!

And then back to Earth - to be peaceful and happy. For a while.

Then the next cycle of Gloom and depression starts, and a person with this type of epilepsy wants to "fly to the Moon" again!

Over the centuries and millennia, people developed methods to TRIGGER the "fly to the Moon" phase of the epileptic episode. Drugs, trances, flickering fire, trance music were used. A lot of time was spent to figure out how people with epilepsy can get from GLOOM to MOON.

Horrific experiments were conducted (especially during World War II, by the Nazis, and later). Horrific Electroshocks.

The Cult/Sect/Family has the tendency to epilepsy, psychosis and autism - it runs in Cult's family.

Regular people in the general population don't usually inherit these tendencies and illnesses. In the general population, under traditional values, the institution of marriage protects us and keeps the genetics healthy. Traditionally, closely related cousins are not allowed to marry and have children. Having children with cousins is a taboo.

We people/peasants are sent to wars. In traditional warfare - horse riding, shooting, flying planes, people with epilepsy have less chance to survive.

The general, traditional population is genetically healthier than the Cult/Sect/Family.

Unfortunately, the Cult's tries to make us, the people/peasants, unhealthy.

Beware of:

Neurotoxins (chemicals) including psychedelics.

Sound waves, including inaudible (outside of hearing range).

Other waves, frequencies, as in ... short very short wave frequencies (???)

Flashes of light can trigger epilepsy.

There used to be warnings in films or videos that have quick flashes. Now, many films, videos and TV have flashes. But no warnings.

I want to share my methods of self-protection - based on what I do:

Avoid sound-wave damage - TAKE your HEADPHONES OFF. Play and listen to acoustic, live music. Learn songs that are easy to sing - acapella (just singing, without backup or instruments).

Avoid films, video games, anything with quick flashes. Watch NATURE. Watch BEAUTY.

Avoid drug or substance use and abuse. Avoid psychedelics.

Stay healthy.

Oracle of Delphi - predictive programming.

Using an "Oracle" and bamboozling the "masses" is OLD. Drama, loud music, flickering fire, loud sounds, alcohol and/or drugs. Dancing around the fire and beating drums.

Now, the Cult is using the SAME METHODS, but NEW TOOLS.

We, the humanity, are not prepared.

TV, films, music videos and music contain loud sounds that can cause sound-inflicted injury.

TV, films, ads etc contain flickering quick flashes, quick cuts and quick zoom -in and out.

Our eyes look at the flashes and follow the movement on the screen - R.E.M, Rapid Eye Movement.

Forcing R.E.M, - Rapid Eye Movement is hypnotic and can trigger epilepsy.

Protect yourself. Avoid watching such things. Stay healthy.

Drugs are being massively pushed on us.

Some drugs can cause a chemical injury to the brain.

Psychedelics cause symptoms mimicking (or inducing) epilepsy and psychosis.

The media, mainstream and alternative use contradictory information to make us confused and nervous.

In the late 1990s, the Cult wanted me to learn these methods and work for them. The Cult wanted me to become the Cult's employee - a BAMBOOZLER.

I refused.

Stay healthy. Stay reasonable. Avoid being BAMBOOZLED.

Cult-Spectrum

There are some large organizations, secret or not so secret, that work for the manipulators.

But the orchestration of the manipulation is concentrated in the hands of one Cult/Sect/Family.

I found myself lured in by this Cult/Sect/Family because of coincidence. I want to use this coincidence to expose this Cult.

Epilepsy and other neurological/mental conditions run in this family. The tendency to have this kind of epilepsy with vivid "dreams and visions" is inherited. The type of combination of epilepsy, psychosis, autism and ADHD, is otherwise unusual. I call it the Cult-Spectrum.

Unfortunately, the Cult-Family uses an unhealthy approach to procreation. This Cult/Sect/Family has been procreating within their family, with cousins, and having children, for ages.

Children in such a family are more likely to be born with epilepsy and other neurological/mental conditions.

People from such a family might have preoccupation with "flying to the Moon," (or to Mars, or other planets) or into the clouds. Or, "time-travel."

And preoccupation with burning things down. Bu-r-ning down the wor-ld. Bomb-ing vol-canos. I'm using dashes, because I don't want the "algorithms" to misquote me and take me out of context. I'm absolutely terrified of the Cult/Sect/Family wanting to bu-rn down the wo-rld and bo-mb vol-ca-nos.

In the late 1990s, the Portland, Oregon Cult told me about their plans.

The Cult wanted to put us, the people/peasants in detention camps, and tell us that we are "going to Mars." Or, into the Sky/Clouds. The Cult was laughing that it would be like in "Star Trek" - TV series that started in the 1960.

I've never watched "Star Trek" but I know about the Cult's METHOD. The Cult is putting things into our COLLECTIVE UNCONSCIOUS - advertising and repeating themes. If we are shown movies about going to a different planet - we are supposed to believe that we are really going!

In order for us, the healthy people/peasants to FEEL as if we were going to Mars or into the clouds, the Cult' plans to poison us, the people/peasants with psychedelics.

Psychedelics mimic the symptoms of epilepsy where people feel like "flying" "flying into space," or "floating in air."

Beware of the "Red Pill". "Red Pill" or "redpilling" is the Cult's code-word for poisoning with psychedelics.

The Cult lures in people like me, smart, educated and healthy, to work for them and to be used.

I refused.

I just called myself "smart, educated and healthy" - not to brag, but to point out who the Cult tries to recruit. The Cult/Sect/Family "envisions" the future, and uses us healthy, smart people/peasants to work for and make this future happen.

No! Not me.

Stay healthy. Stay unbamboozled. Protect us.

Who "envisions" the doomsday? People with Cult Spectrum

Now, in the 2010s and the 2020s, we get news about a variety of "doomsday" scenarios. Power grid (electricity) failure. Cyber attacks. Epidemics. Pandemics. Global warming. Nuclear war.

And news about "going to Mars." And about an "Alien invasion" (Extraterrestrials invading the Earth).

But we, the people/peasants are not told WHO "envisioned" this "doomsday." And WHY. These "doomsday visions" are made by a Cult/Sect/Family who has epilepsy and other mental conditions running in their family for ages. Members of this Cult/Sect/Family EXPERIENCE SYMPTOMS, and have "visions" of "doomsday," mass-destruction, exploding volcanoes, or "flying to the Moon" (or Mars) because of their neurological/mental condition.

In addition to epilepsy, this Cult/Sect/Family also has a tendency to inherit other neurological/mental hereditary/genetic characteristics. Some features of autism, Asperger's syndrome (milder form of autism), ADHD (attention deficit disorder), mood disorder, and schizophrenia - a special Cult-type.

The Cult-type combination includes difficulties with logical thinking, detachment from reality, lack of consideration for the environment and other people, lack of practicality, depressive, negative, anxious ("doomsday") preoccupation (Gloom), preoccupation with destruction, burning things down, blowing things up.

Cult-type schizophrenia might include logorrhea, or what is sometimes called graphomania - talking or writing a lot, but without making much sense. The Cult-type writings and speech is characterized by being disorganized (chaotic), overinclusive (too much detail), fragmented thinking (while speaking, giving just a hint, or innuendo, or a "joke", but no logical elaboration), non-linear flow (broken timelines), contradictions, preoccupation with fantasy and magical thinking, with broken reasoning and solutions that are impractical and impossible.

Another characteristic feature, the "odd manner," in medical jargon "inadequate affect" - grinning or grimacing inadequately. Inadequate jokes. Inadequate behaviors. For example, somebody is grinning and joking while talking about something horrific.

Some symptoms of epilepsy and Cult-type schizophrenia overlap - i e, depersonalization and derealization (living in a "simulation", in a "machine," or in a "dream"), being a

"double" (in a mirror, in a parallel reality, or in a different timeline), deja-vu (feeling that something has already occurred, or already have been seen).

Magical thinking - feeling like having "magical" superpowers. Interpreting random events or random coincidences, as "fortune telling" "signs" or "omens." Interpreting night dreams or as "predictions" or "time travel," or "parallel universe."

In addition, the Cult-Spectrum includes obsessive-compulsive traits. The leaders of the Cult/Sect/Family decide on something (using "visions", "fortune-telling," astrology) and keep going, and going, and going. The Cult/Sect/Family keeps going compulsively, without revising their plan.

During my work as a medical doctor in the early 1990s in my home country, Poland, I met many patients. In the USA, I accredited my medical diploma in 1997, but I couldn't find a job as a doctor.

Still, in the USA, I met many people with a variety of neurological and mental conditions. I worked as a crisis responder for 12 years in Portland, Oregon.

I noticed that the set of common neurological/mental problems in the general population is DIFFERENT from the set of neurological/mental problems running in the Cult/Sect/Family.

The Cult/Sect/Family tends to have a PARTICULAR SET of combination of symptoms and characteristics. I call it "Cult-Spectrum."

Who is who? Who is "They."

Years and decades after my meeting the Cult, I started realizing, with horror, that the Cult might have told me the truth.

In the late 1990s, the Cult told me that they're going all the way back to ancient Greece - the philosophers Pythagoras, Plato, Aristotle... conquests of Alexander the Great and the Oracle of Delphi. (4th century BC)

And going back to ancient India. Indo-Europeans. Indo-ancient Greeks.

It took me a long time to realize that the Cult/Sect/Family might REALLY go back that far. Genetically. Keeping it in the family - - the secrecy - and inheriting the genetics.

The media and the alternative media tells us that there's a shadowy, secret group that manipulates us.

But WHO is the group?

The media referred to them as "THEY."

But who is "THEY"? Specifically?

Stay sane. Stay healthy. Protect us.

Famous people with epilepsy

Some websites list famous people who had epilepsy. We should be discerning what might be true, or not.

Some websites list ancient Greek philosophers, Pythagoras (6th century BC), Socrates and Plato (both 4th century BC) as famous people with epilepsy.

Another ancient Greek philosopher, Aristotle (4th century BC), is sometimes also mentioned as possibly having epilepsy, but with some doubt.

Napoleon Bonaparte, (1769 – 1821) French military leader, and, later, the Emperor of France is sometimes listed as having epilepsy.

I wonder if it's true or not. Napoleon is often depicted as riding a horse. A person with epilepsy would have a tendency to fall off the horse.

Alexander the Great is also listed on some websites as having epilepsy.

Alexander rode a horse (a lot).

Alexander the Great = Alexander of Macedonia (4th century BC) was a military leader who conquered a lot of territory - Greece, what is now Greece and Turkey, Egypt, Syria, Lebanon, ancient Babylon (in what's now Iraq), ancient Persia (now Iran) all the way to Northern India.

I guess Alexander couldn't have had epilepsy, at least as a young man. Because he was a horse-rider!

Maybe Alexander got epilepsy later - maybe he had a head injury or was poisoned.

Alexander died at a young age - 32.

Stay sane. Stay focused. Stay healthy.

Epileptic trance. Dostoyevsky.

To understand what epilepsy is and what it has to do with the Moon (Moon - Luna in Latin), let's look at a text written by a famous writer who had epilepsy.

Russian writer Fyodor Dostoevsky (1821 – 1881) is one of the best known persons with epilepsy. Some of Dostoevsky's writings provide a glimpse into an epileptic trance.

Recently, I read an article with the title "The Day Dostoyevsky Discovered the Meaning of Life in a Dream".

The article is lengthy, so I'll just provide an excerpt.

If anybody is interested, here is the link to the article:

https://getpocket.com/explore/item/the-day-dostoyevsky-discovered-the-meaning-of-life-in-a-dream?utm_source=firefox-newtab-en-us

Below are just some sentences and sentence fragments from Dostoyevsky's short story/dream/experience/epileptic episode.

Notice the Moon, Mars, other planet, coffin, suddenly the grave opened, leaping over space and time, seeing the Sun, or double-Sun, rapture, timelessness.

The "coffin," "grave," "being buried" is the pre-episode (prodromal, in medical jargon).

Then, the blissful phase of an epileptic episode starts, and it's like "opening the grave" seeing the "sun," (or flashes of light or fire), flying, "rapture" or "traveling in time and space" or "traveling to a different planet", superpowers - knowing "everything," - "enlightenment", or "illumination."

I never had such an experience. I only know it from studying medicine, working as a medical doctor, and from meeting the Cult/Sect/Family, especially in Portland, Oregon, in the late 1990s.

Dostoyevsky, excerpts:

"If I had previously lived on the MOON or in Mars..."

"...if I afterwards found myself on EARTH and still preserved a consciousness of what I had done on the OTHER PLANET"

"It became clear to me that life and the world, as it were, depended upon me. "

"I might even say that the WORLD HAD EXISTED FOR ME ALONE. "

"It was terribly BLACK all about me. "

"I am being carried in a CLOSED COFFIN"

"Now I am being BURIED IN THE EARTH."

"Suddenly, my GRAVE OPENED."

"We were borne through SPACE and were already far from the earth."

"I do not remember how long we RUSHED THROUGH SPACE, and I cannot imagine it."

"It happened as always in a dream when you LEAP OVER SPACE AND TIME..."

"I saw our SUN."

"I recognized that it was exactly the SAME SUN AS OURS, ITS COPY AND DOUBLE.
"

"I understood everything, everything! "

"RAPTURE, ineffable rapture exalted all my being. "

"I saw the truth."

"I can go on, go on, even for a THOUSAND YEARS."

Dostoyevsky had his "moment of enlightenment."

To me, this is a medical ILLNESS - epilepsy.

For the Cult, it's GENIUS.

Because of the difference of opinion between me and the Cult, my medical career got cancelled.

That's why I never got a job as a medical doctor after I accredited my medical diploma in 1997.

That's why I get retaliated against by the Cult.

That's why whatever I put on the Internet gets unlisted or shadowbanned on Google.

That's why I have been harassed and threatened.

That's why I'm afraid to write this. But I'm still at it.

Stay focused. Connect the dots. Stay healthy.

Sigmund Freud on Dostoyevsky's epilepsy

Perception of epilepsy was made confusing by Sigmund Freud (1856 - 1939, a medical doctor, born in the Austro-Hungarian Empire, with family roots in the Russian Empire).

Sigmund Freud wrote an article (in 1928) saying that Dostoyevsky DIDN'T have epilepsy.

Sigmund Freud was a medical doctor, a psychiatrist, and very influential. Freud certainly should have known what epilepsy is.

But Sigmund Freud attributed Dostoyevsky's epileptic symptoms - to a "neurosis."

Sigmund Freud looked at "neurosis," or "hysteria," from the perspective of stories/myths from ancient Greece. Freud wrote that Dostoyevsky, instead of epilepsy, had a neurotic "Oedipus complex." Oedipus was a character in an ancient Greek myth.

Besides the Oedipus complex, Freud invented Electra complex. Narcissism, all inspired by ancient Greek myths.

Sigmund Freud told us that the ancient Greek myths were universal. Sigmund Freud was very preoccupied with ancient Greece (and Egypt)

Through using these ancient Greek myths, Sigmund Freud put the ancient Indo-European, Indo-Greek culture into our UNCONSCIOUS.

This is how it works in practice: somebody was having a nervous, mental problem, and they went to see a doctor, a psychiatrist, Sigmund Freud, or one of many "psychoanalysts" trained in Freud's methods.

The "psychoanalyst" gave a "diagnosis" derived from ancient Greek myths. The "psychoanalyst" talked about ancient Greece.

The "psychoanalyst" didn't tell the patient what they were doing - putting ancient Greek myths into our UNCONSCIOUS.

Freudian "psychoanalysts" is indoctrination into the ancient Indo-European system, Indo-ancient-Greek, a polytheistic caste system.

In the late 1990s, the Cult kept telling me that Freud was a genius, "Christian Catholics went to confession, but Christian Protestants didn't. So Freud invented psychoanalysis, to spy and to manipulate Christian Protestants (and, eventually, spy on and manipulate everybody else)." The Cult was laughing.

I was terrified.

Stay sane. Stay focused. Understand.

Freud's religion.

Sigmund Freud's ethnic background is listed on Wikipedia. I don't want to say, because these days, anything related to this ethnic background can be construed as politically incorrect.

I already know that Sigmund Freud views on religion, but I will Google it, just to see what's on the Internet today.

I just Googled "Sigmund Freud religion" .

Google AI told me: "Sigmund Freud, though raised with religious influences, ultimately became a VOCAL ATHEIST, VIEWING RELIGION AS A COLLECTIVE NEUROSIS rooted in childhood experiences and wish-fulfilling illusions. He saw religion as a hindrance to individual and societal development, as it offered comfort through belief in supernatural forces rather than rational explanation."

Wikipedia for Sigmund Freud goes a bit further.

Wikipedia quotes Freud's words about his attitude towards God.

Freud used the word "fantasy."

I'm not putting Freud's "fantasy" opinion here, because I find it too offensive to even quote it.

So, Sigmund Freud was a VOCAL ATHEIST.

Freud called RELIGION a "collective neurosis" (kind of hysteria).

But... wait... let's look at it...

Freud used ancient Greek myths in his teachings. Ancient Greek myths are a part of ancient Greek RELIGION.

Hmm... So, ancient Greek religion was fine with Freud.

But, Freud called religion "a collective neurosis."

Wait. What??? Let's think some more... What religion?

Other religion. Religions.

Freud was AGAINST MONOTHEISTIC religions (Christianity, Judaism, Islam).

In Greek:

MONO=μόνο (mono)=ONLY; THEISTIC - in Greek-Theos Θεός - GOD.

Freud was PRO (pushing) POLYTHEISTIC religions - from ancient Greece, ancient India and ancient Egypt.

In Greek:

POLY=πολύ (polu)=MANY; THEISTIC - in Greek-Theos Θεός - GOD.

In the late 1990s, the Portland, Oregon Cult was following Freud's ideas.

The Cult was AGAINST the MONOTHEISTIC religions. (Christianity, Judaism, Islam) with one exception - Sufism.

The Cult was into ancient Greece. Plus the Sixties "counterculture." And a medley of traditions from India: pseudo-Buddhism (guru Bhagwan Shree Rajneesh in Oregon, in the 1980s), and pseudo-shamanism (because shamans in native cultures get into trances and "fly to the Moon").

A new medley - New Age.

A New Age Wor-ld Or-der.

Stay sane. Stay safe. Protect us.

Sigmund Freud took his anti-monotheism, even further. In his book "Moses and Monotheism" Freud re-wrote the story of Moses.

Billions of people know the story of Moses.

In the monotheistic scriptures (Judaism, Christianity, Islam), Moses is a Hebrew/Israelite child, who led the Exodus of the Hebrews/Israelites out of Egypt and across the Red Sea; and received the Ten Commandments at Mount Sinai.

But.... Sigmund Freud wrote that... Moses was an Egyptian. Freud wrote that Moses was born Egyptian and became an Egyptian priest. Freud was fascinated with ancient Egypt. Freud's "alternative story" of Moses is in Freud's book "Moses and Monotheism" .

That is the Cult's one of main METHODS. Freud, Jung and the Freudians and Jungians REWRITE religion.

The Cult calls it "SYNCRETISM" - taking elements of one religion and adding and mixing elements of another religion. Then, gradually, the Cult takes over.

Stay healthy. Stay sane. Stay un-bamboozled.

Cult - detention camp

The most striking, and horrifying example of the Cult's New Age Wo-rld Ord-er was practiced in Oregon, in the 1980s. The sub-cult was led by Bhagwan Shree Rajneesh, a guru from India. Rajneesh sub-cult built a town (a detention camp) in rural Oregon. In the Rajneesh sub-cult, the followers slept in tents, worked without pay, and worshiped their guru. The followers (or, detainees) were manipulated, drugged and abused.

The Rajneesh cult in Oregon is sometimes presented in the media as a "free carnal relations" cult.

I'm using the old-fashioned "carnal relations" word, because I'm old-fashioned. I believe that people's bodies, people's privacy and their relations should be protected and safe. In my opinion, within a marriage and family, with respect and love for men, women and children.

"Free carnal relations" was one of the Cult's horrible ways to break the tradition of marriage and family. The Cult used the "free carnal relations" as a bait/enticement into Rajneesh cult/detention camp in Oregon.

Historically, the METHOD of enticement - "free carnal relations" - was also used by communism, in the Soviet Union, starting in 1917 and in 1920s. Communists provocateurs agitated against traditional values - against marriage and family. The Communist agitators promised "free carnal relations." And then, the communists put people into hard-labor, detention camps.

Sigmund Freud (1856 - 1939) was born in the Austrian Empire. But his family roots are in the town called Brody, in what is now Ukraine. Before the communist Soviet Revolution, the town Brody was under the Russian Empire.

As the Russian Empire was being turned into the Soviet Union (1917), Freud's ideas were used by the communists - breaking taboos and breaking traditional monotheistic religious values. Followers of MONOTHEISTIC religions (Christianity, Judaism, Islam) were

persecuted in the Soviet Union. Freud's ideas were used in the Soviet 1920s, then got hidden, or used secretly.

Another, horrible idea pushed by Sigmund Freud are his bizarre theories regarding children. Some Freud's theories were about childhood ... first letter s second letter e third letter x - uality. I'm writing it this way, because I wan't to avoid a trigger word, and because I find Freud's ideas abusive and shocking.

Normally, children don't develop an interest in first letter s second letter e third letter x - uality until they are teenagers.

But Freud attributes such interests to children and even infants.

I'm quite convinced that Freud's theories were a result of him having a spectrum of mental illness. I'm guessing that (probably already as a child) he possibly had epileptic episodes in his sleep. And that he subsequently developed his theories (and "dream analysis") based on his experiences of epilepsy and/or psychosis.

In the late 1990s, in my conversations with Portland Cult, I expressed my opinion about Freud.

The Portland Cult got very upset at me for criticizing Freud. The Cult considers Sigmund Freud their "genius."

I got upset back - at the Cult. I was a Medical Doctor. The Cult lured me all the way to Portland, Oregon.

Didn't the Cult want to hear my opinion?!!!

They didn't.

Years and decades later, I still have the same opinion.

Stay sane. Stay focused. Save us.

Psychedelics mimic epileptic trance

What do psychedelics have to do with epilepsy?

Psychedelics can MIMIC an epileptic experience, like the "tripping" and "flying to the Moon" as described by Dostoyevsky.

On psychedelics, otherwise healthy people might experience feeling like "flying," "flying to the Moon", or to Mars, or into the clouds," "traveling through space and time," "timelessness," "living in a simulation," in a "machine," or in a "dream."

In the late 1990s, the Cult was talking about putting us, the people/peasants in camps and telling us that we are going "into the clouds." Or, "going to Mars."

Now, in the 2020s we're getting more and more scary information. About a "trip into the sky," "space," or to Mars.

I pray and hope every day that there are healthy, reasonable people who will protect us.

Stay healthy. Stay sane. Avoid psychedelics.

Epilepsy - full & partial

The writer I quoted above, Dostoyevsky, is said to have a full epilepsy - with full seizures. In medical jargon, full epileptic seizures are also called clonic seizures, or grand-mal seizures. It's when a person falls on the ground and shakes.

There are also either types of epilepsy - called partial, or petit-mal (petit =small) or "absent" episodes. where a person doesn't fall on the ground. The partial epilepsy is "in the head" - literally - there are neurological discharges inside the brain. The neurological discharges don't travel down the peripheral nerves - through the rest of the body - so there are no full seizures.

I think that what is described in "Dostoyevsky dream" article was a partial seizure or a prolonged epileptic state (medical jargon - epileptic fugue).

Genetic vs Symptomatic.

Was Dostoyevsky's epilepsy genetic/hereditary? Dostoyevsky's son, Alyosha, died at a young age after a severe epileptic seizure (according to Wikipedia). Did Alyosha inherit his father's epilepsy? Or did something else happen?

I'm interested in Dostoyevsky's genetic heritage to discover where his epilepsy could come from, genetically.

Fyodor Dostoyevsky, was born in Moscow, Russia and lived in the 1800s (1821 - 1881). According to Wikipedia, Dostoyevsky is descended from a Tartar family, going back to the late 1300s, the Golden Horde (the Mongols).

Hmm...

Mongols were fierce horse riders, who conquered a lot of territory in the 1200s under their leader Genghis Khan (1162 -1227); Mongols, on horseback, conquered parts of what is now Russia, China, all the way to Eastern Europe, what is now Poland and Hungary. Subsequently, Mongols even got close to Jerusalem (Battle of Ain Jalut, 1260). Mongols' conquest was based on their extreme horse-riding and bow-and-arrow shooting skills. Epilepsy and horse riding don't go (ride) together.

Could Dostoyevsky have a SECONDARY epilepsy?

Could his epilepsy be caused by... alcoholism? Mongols have a strong genetic tendency to alcoholism and a genetically-caused poor metabolism of alcohol.

Could Dostoyevsky's "trance" be a result of secondary epilepsy caused by drinking poorly distilled alcohol, with traces of methanol, as it happened in Russia?

I Googled, "Dostoevsky alcoholism"

Google AI says nothing.

There's a thread on Quora: "How did Dostoevsky manage to write being a heavy drinker?"

Some answers/comments:

"His style is that of a drunk rambling incessantly. He probably wrote better in that state"

"Yeah I noticed that. In Brothers Karamazov I noticed there are chapters with barely any paragraphs."

Sigh. I actually haven't read enough Dostoyevsky to be able to tell.

I'm going to leave reading more Dostoyevsky for later.

But, what about Dostoyevsky's SON and his epilepsy? Wikipedia "Brothers Karamazov" (Dostoyevsky's novel) tells us that:

"Dostoevsky's 3-year-old son Alyosha died of epilepsy,[7] a condition inherited from his father."

But, what if Alyosha DIDN'T INHERIT epilepsy? What if Alyosha had SECONDARY EPILEPSY - it could be Fetal Alcohol Syndrome, if his mother drank alcohol during pregnancy (of course, she shouldn't). Or, epilepsy could have been caused by an accident - Alyosha was 3 years old; the little child could have been wandering around the house and could have grabbed some alcohol from the table...

My research continues....

Psychedelics - from ancient Greek

Psyche - ψυχή - soul.

Deloun - δηλοῦν - 'to manifest'.

But, when was the word invented?

Delics - like, a delicacy, delicious, delirious, delicatessen or deli.

No psyche-delics! No neurotoxins!

I don't have epilepsy running in my family. My parents, grandparents, were healthy. As far as I know, my great-grandparents were healthy. They were hard-working farmers/peasants.

My parents were teachers, but peasant-style. Practical. Logical.

I had straight As in Medical School (in my home country, Poland, it was called "straight 5").

I studied medicine in three languages - Polish, German and English.

In Switzerland, where I was doing a medical internship, I was learning so fast that I ended up being told - "you're too smart to be a medical doctor - you should be a Jungian."

I didn't know what "Jungian" was at that point. Eventually, without me knowing what it was about, the Jungian Cult lured me to Portland, Oregon.

In the late 1990s, the Portland Cult tried to MAKE ME have experiences, mimicking epilepsy .

The Cult wanted to MAKE me, a healthy person, take LSD (a psychedelic) and "go on a trip."

I refused.

The Cult wanted to ADD to my abilities. In addition to me being "too smart to be a medical doctor," the Cult wanted me to become a "visionary."

Sigh. NO!!! A difference of opinion.

In my opinion, the Cult tried to BREAK my ability to think logically. The Cult lured me in, a person who was "too smart to be a medical doctor," and wanted to poison me with LSD, so I would think LESS, be LESS logical.

Stay sane. Stay healthy. Stay logical.

"Enlightenment?" "Illumination"?

The Cult advertises LSD, as "opening of the third eye," "enlightenment," or a "trip." For the members of the Cult/Sect/Family who were BORN with the Cult-Spectrum of epilepsy and schizophrenia, "tripping" is natural. "Tripping" is something that the members of this Cult/Sect/Family experience without LSD, as a SYMPTOM of their hereditary/genetic epilepsy and mental spectrum. This Family LIKES themselves and their "tripping" experiences.

For us, the healthy people/peasants, psychedelics BREAK us - BREAK our logical thinking, our resilience and our health. Psychedelics make us into victims of the Cult.

Understand. Stay logical. Stay healthy.

How NOT to become a "visionary."

In the late 1990s, the Cult was saying that I should seek "enlightenment." Become more "visionary" and "creative." Work on "opening the third eye." Became more like THEM. Under the Cult's pressure, I indeed became a bit more "creative." I painted some paintings - most of them quite horrible. I wrote some (terrible) poetry and short stories.

But why?

I spent years studying medicine, to become a Medical Doctor.

But the Cult wanted me to become a painter, writer and poet. And a yoga practitioner. And to practice martial arts (sigh). The Cult wanted me to practice prolonged meditation. For example, the Cult wanted to send me to a meditation retreat where people didn't speak for a week.

I didn't go.

Mostly, the Cult wanted me to read books.

The Cult wanted me to become a BAMBOOZLER - learn to repeat the words and lines from Cult's theories, go on their circuit and talk, and talk, and talk....

I guess that's why the Cult didn't push me too much into doing psychedelics. I had to stay functional and coherent in order to be useful for the Cult.

I didn't want to work for the Cult.

I refused.

Carl Gustav Jung

In the late 1990s, I was invited to Portland, Oregon to study "Jungian psychology."

"Jungian psychology" was presented as very attractive and mysterious.
"Jungian" - as in, Carl Gustav Jung or C G Jung. (1875 - 1961), Swiss psychiatrist who worked together with Sigmund Freud.
Carl Gustav Jung developed ideas of "Creative Imagination." (or "Active Imagination")
"Transpersonal" psychology. "Collective Unconscious."

In the late 1990s the Cult was talking about a "Jung Tower" in Zurich.
The "Jung Tower" was a tower where Carl Gustav isolated (it sounded like for years) to pursue his "Active Imagination."

Only decades later I discovered that Carl Gustav Jung, at least for a period of time, was psychotic.
I remember reading about it a few years ago.
Today, I looked at the Wikipedia page for Carl Gustav Jung.
There's just one sentence saying that Carl Gustav Jung was "on the verge of a suicidal psychosis."
Wikipedia doesn't tell us how severe C G Jung's psychosis was or how long it lasted.
The "Jung Tower," the Bollingen Tower, is only mentioned in footnotes.

I looked at an older version of the Wikipedia page on C G Jung, from 2005.
The old page tells us that "Jung had some form of psychological transformative experience, exacerbated by news of the First World War. (...) Jung's experience (was considered by some) a "creative illness"... "

I Googled "Carl Gustav Jung psychotic"
Google AI told me: "Carl Gustav Jung, at the age of 38, experienced a period in his life that he described as a form of psychosis. He experienced visions, hallucinations, and voices, and at times, referred to it as a "schizophrenic" state. However, he did not experience a complete psychotic break, as he continued to function in his daily life and practice psychology."

What? C G Jung, medical doctor was hallucinating and hearing voices????
And seeing patients? And working as a medical doctor?
And developing the most famous "school of psychology."
And, later, working as a consultant for... a very important... Agency.
What???!!!!

Google AI elaborates: Jung's experience began with visions, hallucinations, and voices, which he himself described as "VISIONS". He initially feared he was losing his mind, but he also saw this as a way to explore the unconscious mind. (...) Jung actively pursued these visions and hallucinations, using what he called "ACTIVE IMAGINATION" to explore them and gain a deeper understanding of the unconscious mind.

That's one of the Cult's METHODS - a SPIN.
In the late 1990s, the Portland Cult was talking about C G Jung's "active imagination."
But the Cult didn't tell me the details.

Years and decades later, I put the dots together:
Carl Gustav Jung was psychotic, but... the Cult advertised it as CREATIVITY and "ACTIVE IMAGINATION."
The Cult advertises psychedelics as ATTRACTIVE.
The Cult advertises PSYCHOSIS as ATTRACTIVE too!!!
NO!!!!

Psychosis is a severe medical/mental condition. Psychosis is "losing your mind."
Literary.

When a regular person, one of us, the people/peasants experience psychosis, we lose our mind, and, most likely, lose a lot more - our home (we're unable to pay the bills), our freedom (we're being put in mental institutions), or we become homeless.

The Cult/Sect/Family has a lot of money and can hide out during their psychotic episodes, and even write books or make artworks or movies about their experiences. And then, the Cult advertises their psychosis as "creative illness."

The Cult didn't tell me that, in the 1920s, Carl Gustav Jung was linked with some Austro-Hungarian scientists who called themselves "Martians." As in - "beings from Mars." There's a Wikipedia page The Martians (scientists) worth looking at.
Carl Gustav Jung and one of the scientists, physicist Wolfgang Pauli, met in Zurich, Switzerland in the 1920s. C G Jung and Pauli (and others?) developed an idea of a phony "Alien" invasion ("Extraterrestrials" attacking the earth).
The Austro-Hungarian scientists, the "Martians" subsequently moved to the USA and proceeded to make the atomic/nuclear bomb.

What?????!!!!!!!

Carl Gustav Jung died in 1961 in Zurich.
In 1961, the future Leader/Guru of the Portland Cult, as a young man, was invited to Zurich to study.
Allegedly, he became the successor of Carl Gustav Jung.
I was told that the Leader/Guru of the Portland Cult invented EVERYTHING since 1961. The Sixties counter "culture." New Age. "Red Pill" - mass poisoning with psychedelics.

There's nothing about it on Google.
I just Googled "who is the successor of Carl Gustav Jung."
Google AI told me, "Carl Jung didn't have a single named successor" (...) and lists some potential names. The name of the Leader/Guru is not there.

Stay sane. Stay focused. Protect us.

A hundred years ago, Carl Gustav Jung and some scientists who called themselves "Martians" (as if, "from Mars"), imagined, (or hallucinated) an "alien invasion" (extraterrestrials attacking the Earth).
A hundred years later, we get bizarre news about "Aliens" and "Extraterrestrials."

And about plans for humanity to "go to Mars."
And news about a possible big war, nuclear war, nuclear winter.

We, the people/peasants are not told who developed these plans, or "visions."
We, the people/peasants are NOT TOLD that these plans are based on - "visions" by a
Cult/Sect/Family who consider themselves "ancient magicians", who have been "keeping
it in the family" for ages.

Did Carl Gustav Jung and the physicists/scientists just ... fantasize?
Were they "tripping"? As in, doing psychedelics?
Or, were they "flying to Mars" and "seeing Aliens" because they had..... psychosis and
epilepsy?

In my opinion, their "visions" are so consistent because these "ancient magicians" are a
part of one FAMILY.
This FAMILY inherits a PARTICULAR, genetic/hereditary combination of epilepsy and
form of schizophrenia with elements of autism, ADHD and compulsive-obsessive
disorder.
Besides genetically inherited traits, this family tells and re-tells their similar "dreams and
visions" to each other.
This family makes and sponsors artworks, movies, politics, writes textbooks and novels.
The "visions" and ideas repeat.
These "visions" are conveyed to us, the people/peasants, without an explanation to create
a "mass freak-out," "mass psychosis." (Cult's words).

Stay sane. Stay focused. Protect us.

Nietzsche

In the late 1990s, the Cult wanted me to read Nietzsche.
I didn't.
Friedrich Nietzsche (1844 – 1900) was a German philosopher who specialized in
Nihilism - how to make things destructive.
Nihilism - from Latin nihil, "nothing" or "the absence of anything".
In the late 1990s, I only heard of some of Nietzsche's ideas - "Superman" ("above
human" in German - Übermensch). These ideas were used in Nazi Germany propaganda.
I'm from Poland, the country in Europe that during World War II (1939 - 1945) was
smashed by German Nazis. I didn't want to read Nietzsche.

In the late 1990s, the Cult, slowly and gradually, tried to undermine my religion,
Christianity.

As I'm doing my research I discovered that, in the late 1990s, the Cult was quoting
Nietzsche at me.
The Cult told me that "Chr-stian-nity was sla-ve reli-gion." I'm using a lot of dashes,
because it pains me to write it.

Nietzsche wrote about Master-Slave morality that describes a super-race, the Superhuman - the Übermensch, who are above the "slaves."

Guess who are the Superhumans - the Übermenschen.

The Cult themselves. The ancient Indo-European (Aryans), Indo-ancient-Greek, "ancient magicians."

Guess who are the inferior people - the "Slaves"

The "inferior people" and the..... it really pains me to write, so I'll use dashes... were the Ch-ri-st-ians. And all the monotheistic religions followers in general.

Nietzsche glorified ancient Greek myths, just like Sigmund Freud and Carl Gustav Jung. I haven't read Nietzsche in detail, but I see the METHOD.

Ancient polytheistic myths are pushed on us/the people/peasants, through our UNCONSCIOUS. Without knowing, we are pushed into the ancient caste/slave system.

In the late 1990s, the Cult was telling me that my religion Christianity, was a "sla-ve religion." I'm using dashes, because it still pains me.

I was baffled. I tried to argue with the Cult.

Yes, indeed, some early Christianity were people/peasants who were slaves in the ancient Roman Empire. People/peasants/slaves in the ancient Roman Empire were abused, thrown to wild beasts in arenas (like the Colosseum in Rome), mocked, tortured and murdered - including being crucified.

In the Roman Empire at that point, the people/peasant/slaves didn't really have their own religion. The people/peasants/slaves, often brought from distant territories, were captured during wars and forced to bow down to the Roman Empire deities - the polytheistic religion. The people/peasants/slaves wanted to have their own religion, of course. The people/peasant/slaves adopted the teachings and story of Jesus Christ as their religion.

I still remember these conversations and arguments with the Cult.

Yes, indeed. Christianity started as a "s-l-a-v-e religion". The "slave religion" helped the early Christians people/peasants/slaves to withstand the abuse by the Roman Empire. Through Christianity, the people/peasants/slaves found their own religion, their own way to connect with God.

The Cult didn't want to listen to my arguments. The Cult kept mocking me and trying to indoctrinate me.

I grew up in Poland, when it was still under Communist/Soviet regime (East Block). It was during the Cold War (organized by the Cult). Under the Communist/Soviet regime, we, Christians were persecuted. Communists considered Christians "ba-ck-wards." Christians couldn't get good jobs. My parents were school teachers; they were never promoted, because we went to church. When I was in high school, martial law (orchestrated by the Cult) was implemented in Poland. The martial law was eventually lifted, but not much changed. I went to Medical School. I had very good grades. But still, the Medical School could kick me out. Because under the communist/Soviet regime, I was facing persecution from the communists for being a Christian.

And then, I traveled across the ocean, to the USA, to Portland, Oregon. And I was shunned again, for being a Christian.

The Portland Cult told me that I couldn't be a Medical Doctor, because "Chris-tia-nas didn't belie-ve in scie-nce." And that "Chri-stian's belie-ve in ta-l-kin-g snakes."

And the Cult was telling me to read Nietzsche. Just like the German people/peasants were told to read Nitzsche, in preparation, (by the Cult) to become Na-zis?

Fortunately, I was already in my late 20s/early 30s when the Cult lured me to Portland, Oregon. I was a Medical Doctor, strong headed.

The Cult wasted my time. The Cult cancelled my medical career.

But, the Cult didn't manage to get to me.

I thank God for every day of my life. I'm happy I survived the Cult's retaliation and harassment. When I'm being harassed, or threatened, or mocked, I always think about the trial of Jesus. I don't respond to provocations. That's how I've survived so far.

I keep my connection with God, always.

Stay connected. Stay healthy. Protect us.

Neurodiversity. Neuro-history.

I really don't want to read Nietzsche - not then, in the late 1990s, and not now. But, for the purpose of my research, I skimmed through some Nietzsche. Mostly, I'm interested in Nietzsche's neurological and mental health. Nietzsche's neuro-history.

I just Googled: "Nietzsche schizophrenia"

Google AI tells me that "some interpretations suggest Nietzsche had schizophrenia. It's more likely he suffered from bipolar disorder or frontotemporal dementia." Google AI elaborates, giving other possible diagnoses: "Neurosyphilis" (brain damage due to syphilis infection)

Google AI doesn't mention epilepsy.

I just Googled: "Nietzsche epilepsy"

Google AI tells me that, "Friedrich Nietzsche's health was plagued by neurological disorders, including possible seizures, which may have been related to epilepsy. HIS FATHER also SUFFERED from EPILEPTIC SEIZURES, suggesting a potential GENETIC LINK."

Oh. Epilepsy running in Nietzsche family. Why didn't Google mention it in the previous search?

The PARTICULAR combination of symptoms of epilepsy with very PARTICULAR hints of schizophrenia appears again. Logorhea, or graphomania (talking or writing a lot without making much sense.) Social difficulties.

Cult-Spectrum.

I read a little bit of "Thus spoke Zarathustra," a work by Nietzsche.

Nietzsche, just like Freud and C G Jung, popularized content from the ancient world. Zarathustra was an ancient Persian religious leader. (Persia - now Iran). I only read a little bit of "Thus spoke Zarathustra," the beginning.

Nietzsche:

"went into the mountains" (the "high" or "flying" phase of an epileptic seizure)

"sun" (flashes of light or a "blast" during the epileptic seizure)

"cave" (prodromal depression and anxiety before an epileptic seizure)

"Therefore must I descend into the deep" (probably some way to trigger an epileptic seizure, some way to go from "Gloom to Moon" Apparently, the way goes deeper into the GLOOM first)

"givest light also to the nether-world, thou exuberant star" (coming out of the GLOOM, the blissful phase of epileptic seizure achieved)

"I GO DOWN" (Gloom - the pro-dromal phase of epileptic seizure)

"I shall descend" (Gloom)

"reflection of thy bliss"(blissful phase of an epileptic seizure, also could be seeing double - a reflection - like in a mirror or in a deja-vu)

"This cup is again going to empty itself" (the GLOOM suffering will turn into the blissful phase of epileptic seizure).

"Thus began Zarathustra's down-going" (depression, anxiety, or probably some way to trigger an intense epileptic seizure, but at the cost of going into heavy gloom first).

I stopped reading.

Plus, Nietzsche's horse-back riding difficulties. Nietzsche had a serious horse-back riding accident.

Epilepsy and horse-back riding don't go (ride) together.

Epileptics are not accomplished horse riders.

I'm just pointing out the patterns - neurodiversity that runs in this Cult/Sect/Family.

Nietzsche, at the age 44 had some kind of a nervous breakdown and spent the rest of his life in a mental hospital.

To summarize, Nietzsche was born nearly blind, had hereditary epilepsy and seemingly other elements of the neurological/mental spectrum.

But in his writings he fantasized about the Superhuman - the Superman, the Übermensch.

The Super-hero.

Nietzsche's writings were used to inspire the German people/peasants to become Nazis, go to war, kill other people/peasants, and then, when the war was turned around (by the Cult) get killed themselves.

Stay safe. Stay strong. UNDERSTAND.

"Ancient magicians" versus Horse-riders

Some famous writer, or politician said that "the pen is mightier than the sword."

In other words, manipulation is mightier than raw power.

The "pen" (writings, manipulation, artworks) have been used by the Cult since ancient Greece (4th century BC).

During the European Renaissance (the late 1300s in Italy and Spain, the 1400s and 1500s elsewhere in Europe), the "ancient magicians" became the manipulators of Europe.

The Cult makes us, the people/peasants fight each other.

We, the healthy people/peasants are sent to wars.

The Cult/Sect/Family sits the wars out, watching, laughing and directing battles, having epileptic seizures and/or psychotic episodes, tripping, procreating, having visions, writing rambling books, making art, music and movies. To manipulate us, the people/peasants, to fight even more. The Cult/Sect/Family takes the spoils.

Stay sane. Stay strong. Protect us.

Already in the European Renaissance, the Cult was PLANTING their future manipulations - artworks, writings. In the late 1990s, the Cult pointed out some of these artworks to me. The Cult told me their stories.

The Cult was laughing.

I was sad.

"Renaissance" means a revival of ancient traditions.

During the European Renaissance the "ancient magicians" started taking us "back" to the times of Plato, Aristotle and the ancient Greek polytheism and the ancient Indo-European (Indo-ancient Greek) methods of manipulation.

Before the European Renaissance, in the Middle Ages (Medieval period), wars were fought by men riding horses. Including Kings. A man, a sword and a horse. Against a man, a sword and a horse. Sometimes a bow and arrow.

Kings rode into battles. Knights rode into battles. Soldiers rode into battles.

Kings fought. Knights fought. Soldiers fought.

Kings died. Knights died. Soldiers died.

Kings won. Knights won. Soldiers won.

Natural selection. Survival of the strongest.

The Cult looks down at the Middle Ages - as the DARK AGES (Cult's words).

The Cult considers the European Renaissance the Cult's greatest achievement. Revival of art, values and methods from the ancient world. Mainly, ancient Greece, and the territory conquered by Alexander the Great in 4th century BC.

Since the Renaissance, fighters and horse riders (now tank riders, airplane pilots) keep fighting, but under the Cult's manipulations.

The Kings don't ride into battles.

The Kings are now hidden - the Cult. The Cult can't ride horses. The Cult can't fly airplanes. The Cult sends us.

The fighters and horse riders need to write more.

But, first, we need to UNDERSTAND the manipulation.

Stay strong. Stay healthy. Protect us.

Stay connected.

I know that the Cult/Sect/Family infiltrates whole countries, large organizations, media, religions, religious institutions.

But the Cult can't infiltrate God.

We, the people/peasants, and everybody, need to maintain our connection with God. We need to protect ourselves from being mocked shamed and bamboozled, from being pushed into wars, camps, and pushed into Cult's "experiences" to "fly away to Mars" or "into the clouds" under psychedelics.

The connection with God doesn't need psychedelics.

The connection with God is maintained through taking time to turn to the God and through a prayer.

Stay focused. Stay connected to the higher power. Protect us.

In the late 1990s, when I arrived in Portland, Oregon, the Cult told me, "do what you're told and don't ask any questions."

I was an outsider. I didn't know that the requirement to keep silent was serious.

I was lured by the Cult in because I was a Medical Doctor. And because I was smart, hard-working and healthy. And because I carried a physical resemblance to a historic person. A coincidence.

The Cult believes that there are no coincidences. The Cult believes that everything is ordained according to some greater plan, and "accessed" during "visions" by their Leaders/Gurus and their "oracles."

The Cult believes that they HAVE TO FOLLOW these "visions" and plans.

And that we, the people/peasants, HAVE TO FOLLOW the Cult's "visions" and plans too.

We DON'T HAVE TO FOLLOW.

They DON'T HAVE TO FOLLOW their own "visions" and plans either.

I believe that we have free will.

And I hope and pray that FREE WILL will save us from doomsday "envisioned" by the Cult.

I even hope and pray that the Cult might limit their "visions" and try to become reasonable.

In the late 1990s, I was lured in by the Cult to Portland, Oregon, due to a coincidence.

I'm a logical person. I'm not into believing in coincidences as something pre-ordained.

But I'm practical. So I want to use this coincidence to the best.

I want to share what I learned as a Medical Doctor. And what the Cult told me. And what I discovered about the Cult.

I hope and pray that we find a way to stay alive, healthy and sane.

Understand. Stay sane. Save us.
